

Hide an object

Getting active

15 – 30 mins

What to do

- Choose a natural object that you really like
- Place it somewhere safe where it won't be blown away or moved
- You could even bury it and mark the spot where you buried it
- Next time you visit, check to see if it's still there

Things to think about

- What made you choose that particular object?
- Was your object still there when you returned?
- If not, what do you think happened to it?
- How did you feel when you found it again / realised it had moved?
